**Purpose:** This webinar series will provide information on home and community-based services for children and youth with specific health care needs. These programs are designed to support particular populations and some programs waive parental income limits, allowing families of all incomes to receive needed support that might otherwise be out of reach.

The first webinar will serve as an overview of all home and community-based Medicaid programs, while the remaining three take a deeper look into each program. Learn about eligibility requirements, services included, and how to apply. Participants may register for all 4 or for only those of particular interest.

**Who Should Join:** All are welcome! Individuals with specific health care needs, their caregivers & family, and any medical, school, or community providers who work with this population should attend.

**Event Contact:** Bailey House, Title V CYSHCN Program Manager, 443-571-5641

**In collaboration with:**

Maryland Department of Health (MDH) Office of Long Term Services and Supports (OLTSS), Developmental Disabilities Administration (DDA), Medical Benefits Management (MBM), and Maryland State Department of Education (MSDE).
